Songwriting/recording,
photography

PROFILE

Front-End Developer with a proven ability to get the job done. I am looking for an opportunity to mentor and be mentored in a highly collaborative and vibrant environment. I enjoy working independently and being pushed to new heights, as demonstrated by my unique educational history. I am anxious to join your team and build quality working software.

EMPLOYMENT HISTORY

Owner/manager & recording/mixing engineer at Hope Harmony

January 2023 — Present

Hope Harmony takes a unique approach to music production by recording a large number of people individually, in harmony, and then mixing them together to create beautiful tracks. I am the brains and lead of Hope Harmony; I write songs, create instrument backtracks, and write harmony parts. I also record and mix every person. check us out at youtube.com/@hopeharmony

Quality Assurance Engineer at Our Sunday Visitor, Huntington

May 2021 — October 2022

Worked tightly with the developers to test and provide feedback to software while it was being created. This included manually testing, making sure the software matched the designs and behaved correctly, and writing test automation. The automation consisted of clean, maintainable, reusable scripts to test product quality and performance.

Factory Worker at Adventure Homes, Garrett

December 2022 — June 2023

Read plans and orders from the customers, carrying and running hundreds of pounds of wire a day. Troubleshooted electrical issues while working on a team.

EDUCATION

B.S. in Computer Science, Purdue University Fort Wayne

August 2023 — December 2027 GPA: 3.89

Certificate in Web Development, Eleven Fifty Academy, Indianapolis

September 2020 — December 2020
